THE PUBLIC LEDGER CO. OF MAYSVILLE, KY.

The French Government and the Catholic Clergy at War.

Bishops Deprived of Their Salarie the Government for Interfering in he Last Elections By Issuing Ad-dresses to the Catholic Electors.

PARIS, May 9.—The government has deprived six bishops of their salaries for interfering in the last elections by issuing addresses to the Roman Catholic electors. This is said to be the beginning of the separation of the church and state in France, and hereafter the policy will be held as the chief feature

and state it. Find the chief feature of the Loubet ministerial program. The pastoral letters, for the reading of which these bishops are disciplined, instructed Catholic voters that they be longed to the church militant and that the government was carrying on a "double-faced satuatie war" against the church, and suggested that nobody was bound by laws which it did not annove.

approve.

The stoppage of salaries is denounced by the party of the prelates as a crying outrage on the ground that the payments to the church are an indemnity for the seizure of her property in the revolution, and therefore can not be withheld rightfully by the government.

ment.

There is a general feeling that the Loubet ministry is resolved to fight to the end for the complete supremacy of the state, as well as for the separa-

the state, as well as for the separation.

The French clergy are said, even by many French Roman Catholics, to be more carnest and radical in their contentions for every jet of the list the pope himself. As regards the stoppage of salary, moreover, it is said that the clergy might as well, once for all relinquish all hope of convincing the government that they are other than civil severalts, and will get their salaries as such during obedience to the law.

Circumstances beyond our control compel us to raise this money; thence our great reduction sale. Every day our sales have shown all we asked since the commencement of our big cut in order to double our former sales. We sold twice the quantity of goods that we had ever soid before during the same time, but did not take in a corresponding amount of money. Anyone can see that Loos suits worth 48 to one, when sold at their actual value, will amount to \$15,000; but when they are sold at \$7.50 a suit, as the case has been with us, the money in drawer only counts, up half as much. This ratio of actual value of goods sold and the amount of cash received was universal throughout the store. Men's, Boy's and Children's Suits, Hats, Underwear, &c., &c., &c., all sold for prices far less than their intrinsic worth. THIS MONTH BARGAINS WILL BE BETTER
